

# **MULTIFLEX Chain**

Multiflex chain has been engineered for multi-dimensional movements with special focus on robot applications and new generation machining centers.

This chain completes the range of products included in Brevetti Stendalto's robot series and offer to the option to dress completely the robots trough a single supplier.

The chain is completely closed but easy to open and easy to wire thanks to the covers that can be simply removed by means of a screwdriver.

Every part of the chain can be internally inspected opening the covers at any point.

Easily shortenable and easily extendable.

Chain's Part Number: **MFC65100**, Link's Part Number: **MMC65100**, Cover's Part Number: **C65**.

## HEAT PROTECTION KEVLAR JACKET

The heat protection jacket features an internal tissue made in Aramid/Kevlar, and an outer tissue made in aluminium. It is used to wrap the MULTIFLEX chain. It protects the chain from weld slags up to 540 °C, and reflects thermal radiations up to 95%.

Kevlar tissue offers good resistance against oils, greases, acids, bases, and solvents in low concentration. The outer tissue also has good resistance against UV rays.

## EXAMPLES OF APPLICATIONS

*With the combination of our Robot and Multiflex chains, we can completely dress any antropomorphic Robot!*

## TESTER MACHINERY IN BREVETTI STENDALTO

- Test started 01/06/2017
- N° 31 movements per minute, +360°/-360°
- Operating 24h/24h.

So far (26 of July, 2017), we made about 2,5M of Cycles without any problem.

## Multiflex chain is on display at EMO Hannover 2017
