

Mistral

TRC-12530-A4PI and TRC-20030-A4PI are customized version of wide used Mistral cable reels, properly designed for shore power connection.

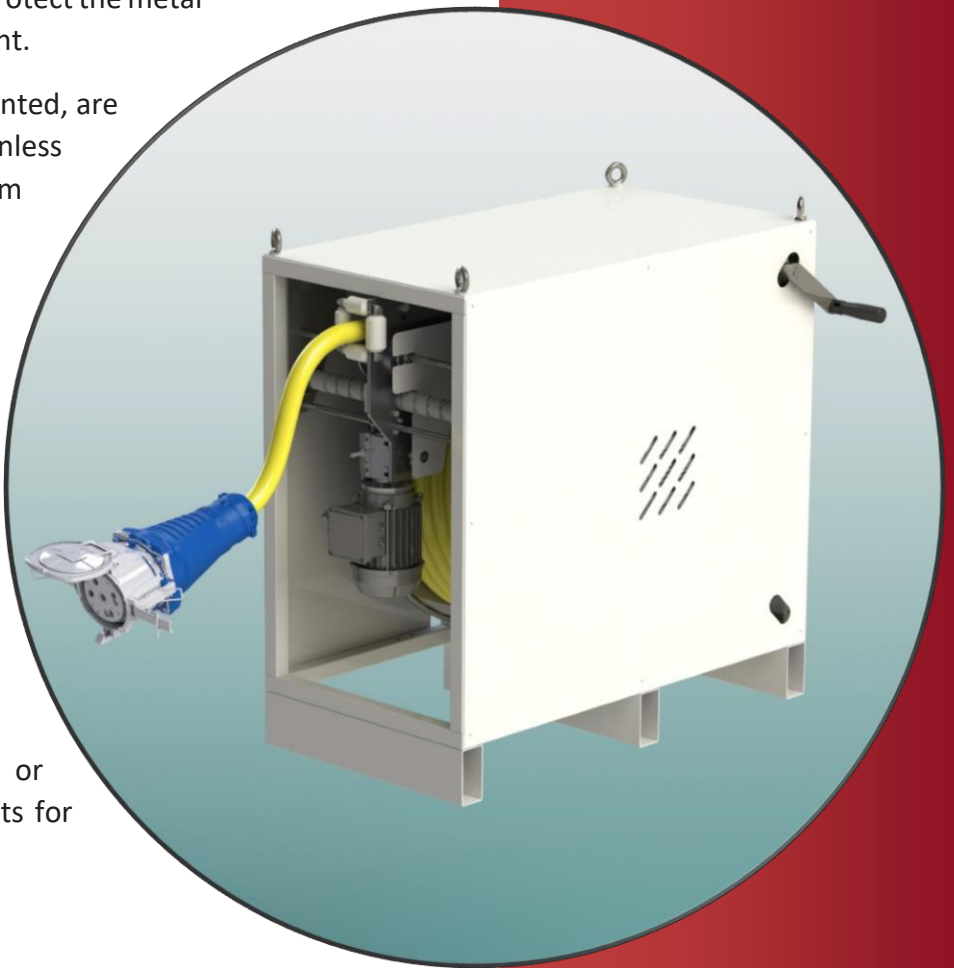

The reels are available in 125A and 200A, provided with slipping and plug-socket system on both sides of the cable.

Appropriate painting is performed to protect the metal components from external environment.

All the components that cannot be painted, are provided in appropriate material (Stainless steel or Nickel coated) for long term usage.

MAIN FEATURES

- Automatic spooling device to assure a correct cable reeling
- Cable spool integrating both recovery spring and slipping
- Safety limit switch (all in/all out)
- Both panel and remote controls
- Stainless steel frame with painting suitable for marine environment
- Provided with cable 4G35 or 3x70+1G35 both with 4 safety pilots for insertion recognition
